

Prince Mendpara

MERN STACK DEVELOPER

prince.m.7405@gmail.com | +91 74058 68873 | LinkedIn | Github

EDUCATION

Full Stack Web Development | May 2022 - May 2023

Masai School , Bangaluru

Bachelore Of Engineering | May 2016 - May 2020

Gyanmanjari institute of technology , Bhavnagar

TECHNICAL SKILLS

Languages : JavaScript, TypeScript, HTML

Frameworks: Node.js, Express.js, React.js, Ts.Ed, Next.js

Databases: MySql, MongoDB

Developer Tools: Git, AWS, VS Code, Cursor,Windsurf

Others: Socket.IO, TypeORM, AWS EC2, AWS S3, AWS Route 53

EXPERIENCE

BOSC Tech Labs Pvt Ltd. | Sept 2025 - Present

Full Stack Developer

- Developed and maintained scalable full-stack applications using **React.js** and **Node.js** (Ts.ED framework) following clean architecture principles.
- Implemented authentication and authorization using **Firebase**, including secure user management and protected routes.
- Designed and integrated **AI-based APIs** and multiple **third-party services** to enhance application functionality and automation.
- Built and consumed **RESTful APIs** using **Ts.ED**, ensuring modular, maintainable, and well-documented backend services.
- Designed and optimized **MySQL** and **NoSQL** databases, focusing on efficient schema design, indexing, and performance-optimized queries.
- Contributed to **system design** and **database architecture**, ensuring scalability, security, and long-term maintainability.
- Ensured secure data handling and seamless frontend-backend integration across applications.
- Managed end-to-end deployment of MERN stack applications on **AWS** (EC2, S3, CloudFront), including **server configuration**, and **domain setup**.

PROJECTS

Chef Ready

Tech Stack: React.js, Node.js (Ts.ED), Firebase, MySQL, AWS (EC2, S3).

Chef Ready is a multi-platform recipe management application designed for both users and professional chefs. Users can browse recipes and import them directly from social media platforms for personal use. The web application allows chefs to register, create, and manage recipes either manually or by importing content from supported social platforms. An admin panel is included to manage users, chefs, and Reported Entities, ensuring smooth moderation and system control.

Consent Connect

Tech Stack: React.js, Node.js (Ts.ED), React-Admin, Firebase, MySQL, AWS (EC2, S3).

Consent Connect is a digital agreement management application that allows users to create and customize agreements using templates provided by the admin. Users can edit agreement content, digitally sign documents, and send them to other parties for signing. The admin panel, built with React-Admin, enables administrators to manage agreement templates and system configurations efficiently.

Capermint Technologies Pvt Ltd. | Feb 2025 - Sept 2025

Jr. Software Developer

- Worked on designing, developing, and maintaining scalable web applications with a focus on **performance** and user experience. Gained hands-on experience with modern web technologies and agile development practices.

PROJECTS

PST Square - School Management System

Tech Stack: MongoDB, Express.js, React.js, Node.js (MERN)

Developed a full-featured school management system named PST Square using the MERN stack. The platform is designed to streamline and automate key administrative and academic processes in schools.

Golden Fantasy 11 - Fantasy Sports Platform

Tech Stack: Node.js, Express.js, MongoDB

Contributed as a backend developer for Golden Fantasy 11, an online fantasy sports platform. Focused on building robust and scalable server-side logic to support game features and promotional functionalities.

Flourish Creations Pvt. Ltd. | Aug 2023 - Feb 2025

MERN Stack Developer (Team Lead)

- Contributed to delivering a finalized **research project**, demonstrating **teamwork** and project execution skills applicable to Web development workflows.
- Interpreted data to inform decisions, mirroring data-driven development processes in MERN stack applications.
- Created **RESTful APIs** to ensure seamless data exchange between frontend and backend.
- Designed an admin panel for dynamic content updates, improving content management efficiency.
- Integrated **AWS** services like EC2, S3, CloudFront, and Route53 for hosting, storage, and content delivery, ensuring high availability and scalability.
- Implemented authentication and role-based access control for secure operations.
- Designed and maintained **MongoDB** databases, ensuring efficient schema design and query optimization for high-performance data operations.
- Implemented secure and seamless payment processing systems using popular payment gateway **Razorpay**,
- Designed and developed a user-friendly application using **React.js**, **Capacitor**, and **SQLite** to simplify sales voucher creation and management for non-technical users.
- Enabled seamless upload of sales vouchers to **Tally** by generating XML files in the required format, reducing manual effort and eliminating errors.

PROJECTS

Desi Kothi Ice Cream

Tech Stack: React.js, Node.js, Express.js, MongoDB, AWS (EC2, S3, CloudFront).

Desi Kothi Ice Cream Is a Ice Cream Brand Which is representing desi taste of Kothi Ice Cream so, in this Dynamic Website We cover All information of that brand .

Flonix Technology

Tech Stack: React.js, Node.js, Express.js, MongoDB, AWS (EC2, S3, CloudFront).

The Flonix website serves as the digital presence of Flonix, showcasing its innovative business automation solutions. The website provides detailed information about the platform's features, benefits, and industries it caters to, along with a seamless user experience for potential clients to explore and connect.

SR Enterprise Software

Tech Stack: React.js, Capacitor ,SQLite

This App is developed to reduce work on Tally. by use of this app user can make sales vouchers and upload it on tally so , no technical skill required for managing or making sales voucher in tally.

Filta

Tech Stack: React.js, Node.js, Express.js, MongoDB, AWS (EC2, S3, CloudFront).

Filta is an innovative platform designed to help users create, customize, and manage their digital business cards effortlessly. It bridges the gap between traditional business cards and modern technology by offering NFC-enabled physical cards that complement the digital solution .
